### **Clay Chalkville High School Receives New Backstop Around the Infield Thanks to Mr. White's and Mayor Webster's CTE Class**

Mayor Charles Webster and Mr. William White lead Career Technical Education classes at Clay Chalkville High School. The students in their classes work on various projects with brick and block installation. Their latest project consists of installing 500 blocks for the backstop around the infield at the CCHS Softball Field. The students especially enjoy completing projects around their school.

“The students love coming together and working on projects that help enhance the look of the school. Last year, our largest project was designing and installing the new CCHS sign on Deerfoot Parkway. It was hard work, yet very rewarding as we completed it during the summer and it was ready to greet students at the start of this school year. Now, everyone travelling down Deerfoot can see a beautiful sign that represents our students,” said Mayor Webster.

The Career and Technical Education program is a vital, progressive, and rigorous part of the total educational system that provides students with life skills and prepares them as a workforce in which business and industry are confident. \*

To see pictures of the new backstop and CCHS sign, please visit the city's official Facebook page at The City of Clay.
